A Independent ten-period experiments
Cycle: certified law
Star: certified law
Cycle: earlier single-tilt upper bound
Risk specification 10⁻¹⁰⁰
70 independent copies
log₁₀ wrong-direction probability
Number of independent copies, K

B One uninterrupted trajectory
Earlier horizon: 80 periods
Cycle: correlated trajectory
Cycle: all-horizon upper bound
Star: correlated trajectory
Star: all-horizon upper bound
log₁₀ wrong-direction probability
Consecutive protocol periods, n
